

HOW TO REPLACE YOUR TOILET

Tools needed:

- Grips
- PTFE Tape
- Pan connector
- Wall plugs and screws
- Isolation valves
- Adjustable wrench
- Screwdriver OR Electric Screwdriver
- Masking Tape
- Old towels/cloths
- Pipe Detector
- Masonry Drill Bits
- Lubricant
- Drill

IMPORTANT: All Buildland products are designed for domestic landscaping use only. Products are not designed for use on driveways unless stated. Ensure driveway laying guidelines are followed.

Step 1:

Disconnect your water supply

- Isolate the water supply to the toilet either locally or at the mains.
- Flush the toilet to empty the cistern.
- Disconnect the water feed from the inlet valve.

Step 2:

Remove your existing toilet

- Remove any fixings and gently pull the toilet away from the soil pipe.
- Carefully dispose of the toilet as there may still be some water in the pan and cistern.

Step 3:

Prepare your new toilet

- Assemble the toilet according to the manufacturer's instructions.
- To ensure it doesn't have any leaks, pour a couple of litres of water into the cistern, leave it to stand (ideally outside) for an hour and then check all the seals.
- Position the newly assembled toilet in front of its final position.

Step 4:

Connect the new toilet

- Insert a new pan connector into the soil outlet pipe, being careful not to damage or dislodge any seals or gaskets. A lubricant can help here.
- Gently slide the toilet outlet into the connector by pushing the whole toilet back and into place.

Step 5:

Reconnect your water supply

- Connect your water supply to the inlet valve via a 15mm isolation valve, ensure that PTFE tape is used on all the compression joints.
- Open the inlet/isolation valves to fill the cistern, then test for leaks by flushing.
- If there aren't any leaks fix the toilet into position with the fittings supplied

Disclaimer:

All installations will be different. These instructions should only be used as a general guide. Please always refer to the manufacturer's instructions. If you are in any doubt whatsoever about how to carry out any of the steps, please seek professional advice.
